

KIDS, TAKE CHARGE OF YOUR ELECTRICAL SAFETY

X

DON'T overload one power point or power board.

✓

DO keep appliance cords untangled and away from heaters.

X

DON'T put an object into a power point (other than a power plug).

X

DON'T put drinks near your game console or electrical devices.

X

DON'T use electrical appliances if you're wet, standing in water or near water.

X

DON'T put metal objects in the toaster.

X

DON'T swim during a thunderstorm.

REMEMBER:

If you're not sure, ask an adult!

ELECTRICITY IS AMAZING STUFF.

It can power everything from your iPad or a car through to a sports stadium...

However it can also be **DANGEROUS!** If you're not careful around the house, you could end up getting hurt. But luckily, you can prevent any accident by following the tips shown on this image!

X

DON'T fly anything near power lines or climb trees near power lines.

Please share and print this image for your home or school to help raise more awareness.
